1. Attached is the extant listing of [REDACTED] priorities which you may wish to review as background. This listing was prepared in 1970 as a basis for negotiating the film distribution requirements for the then forthcoming [REDACTED]. There has been no formal modification or update of these priorities in recent years, although we have discussed them from time to time.

2. The 1970 context was the question of whether, in view of the large quantities involved, [REDACTED] should plan to receive "one of everything"

3. The decision in the end was that [REDACTED] should receive one copy of [REDACTED] according to geographic breakdown [REDACTED] on the attached list. They would use this to gain experience with the materials and we would subsequently adjust their receipts if necessary. To date, there has been no reason for making such adjustments.
